*US-Europe*

*Directed Energy Weapons, Military Neuro/Biotechnology  
& Systemic Corruption*

**First Aid for Victims**

by Dr. Katherine Horton for the Joint Investigation Team

JIT/20180830/007/G/KH/V1

**Abstract**

3 Becoming the victim of the Secret Services is a terrifying experience as the methods  
of disintegration, torture and destruction from the worst systems that humanity has  
ever produced like the East German Stasi and the Nazi's Gestapo in WW2 Germany  
are applied to the victim, along with a host of modern military technology that has  
6 been classified for decades and is therefore outside the experience or knowledge of  
most people. This can leave the victim isolated from family and social support  
networks and with no one to talk to about the problems. In fact, social isolation is  
9 one of the goals of this program. This Guide is intended as a quick help manual for  
victims of the Secret Services. It summarises the main forms of attack on the victim  
and gives basic advice on how to counter attacks and how to shield from them. It  
12 takes the form of bullet points to give a quick overview over each topic. The guide is  
by no means complete and does not claim to have all the answers, but it is intended  
to serve as a first start for those who are startled and disconcerted by what is  
15 happening to them or as a document to turn to when the attacks get unbearable.  
Further information can be found on the website of the Joint Investigation Team  
<https://jointinvestigation.org> and Dr. Katherine Horton's website <https://stop007.org>.

**Table of Contents**

1 Gang-Stalking.....	3	6 Secret Service Criminality.....	7
2 Directed Energy Weapon Attacks.....	4	7 Secret Societies.....	7
3 Non-Consensual Implanting.....	5	8 Genocide.....	8
4 Neurotechnology Attacks.....	6	9 Systems Analysis for Better Systems. .	8
5 Asset-Stripping.....	6	10 The Joint Investigation Team.....	9

# 1 Gang-Stalking

- 3 • It is a world-wide terror network of stalkers.
- 6 • It is using the national surveillance network of the Intelligence Agencies and their contractors.
- 9 • It's based on the FBI's *COINTELPRO*, the Stasi's *Zersetzung* and the terror methods of the Gestapo.
- 12 • The NSA whistle-blower and former Joint Investigation Team member Karen Melton-Stewart found out that Lockheed Martin is running gang-stalking in 47 of the 50 US States.
- 15 • All Western Intel went through a phase of rapid expansion since 2001.
- 18 • In that expansion, Western Intel have recruited people in droves from all walks of life but mostly from low-income backgrounds.
- 21 • Often gang-stalkers are paid off the books in, for example, gift cards so that it doesn't leave a money trail.
- 24 • There is something called Pay-Stalking whereby people earn money through an app for stalking a person. This has been set-up by Intel to farm out and gamify their stalking operations.
- 27 • In the US, the gang-stalkers likely come from the large pool of those who were turned into food-stamp users by the last financial crisis. After the financial crisis of 2008, the number of food-stamp users became as large as the population of Spain. This means that effectively an entire nation is available to descend down on the productive part of the population for asset-stripping.
- The gang-stalking also includes home break-ins as “Standard Operating Procedure”.
- Sabotage of cars is also common, as are death threats and mock assassination attempts on the victims to keep the victims in a non-stop state of terror.

## 1.1 What to Do About Gang-Stalking

- 30 • Stay calm and photograph the stalkers. Zoom in on them to get their faces.
- 33 • If you can film and also swing the camera around 360 degrees slowly so that their helpers can be identified too.
- 36 • If they are overt it's about intimidation and not about physical violence.
- 39 • Do not confront or try to educate them. Stay passive no matter what happens.
- 42 • Do not respond to provocation. If any surreal or strange scenes are put on, make sure to film them and give a commentary while you are filming as if you were reporting to a court.
- 45 • Get a dash-cam for driving as stalkers will follow you by car and one can work out from the footage who they are. It also discourages dangerous driving by them.
- Get used to the idea that you will be moving through stalkers 24/7 like a cloud of flies until these programs are shut down.
- If you accept that stalkers will be around you all the time you will not be surprised to see them or keep getting annoyed at them or about the situation.
- Don't waste emotional energy on the stalkers even if it is disconcerting.
- Focus your energy on collecting evidence and shutting down these crimes.

## 2 Directed Energy Weapon Attacks

- 3 • Directed Energy Weapons (DEWs) can shoot through 2-3 walls and still cause cancer, heart attacks, strokes, brain damage and instant death.
- 6 • DEWs don't leave forensic trails like bullet holes. This makes them the weapon of choice for covert mutilation and murder.
- 9 • As such, DEWs are the staple for generating revenue for Big Pharma.
- 12 • There are several victim reports now that communities in Canada, UK, Germany and are being machine-gunned with DEWs from drones at night.
- 15 • Once the secret service networks begin to assault a victim with Directed Energy Weapons, in most cases they do not stop until the victim is dead.
- 18 • DEWs also interface with the covert body-implants and they use the body implants as target calibration. It helps to train the machines on hitting a certain body part.
- 21 • The market for DEWs is said to expand from 8bn to 43bn over the coming years.
- 24 • They come in all sizes but can also be hidden in cars, handbags and even mobile phones.
- 27 • Attacks of victims inside their own home, especially at night, is common in all Western countries.
- 30 • Attacks driving, especially on the motorway, are also very common.

### 2.1 What to Do About Directed Energy Weapon Attacks

- 33 • Shielding is the most important counter-measure. Use as much metal around you as possible. The thicker the metal the better.
- 36 • Alu-foil works very well but you need to think about back reflections. Several layers might be required for pulsed shots, however, already one layer is enough to stop microwave burning.
- 39 • Protect head, heart and then your inner organs first. Once you have those covered, shield your knees.
- 42 • If the pain doesn't stop upon shielding, it could be that it is due to a chip implant.
- 45 • When fired on by Pulsed Energy Projectiles, the impact can be heard at high intensity and they can even put a dent into metal foil.
- 48 • It is as good as impossible for most people to shield completely from electromagnetic assault. That's why court cases are so important to stop the systematic machine-gunning of the population.
- 51 • Sadly, Faraday cages are useless with modern electromagnetic weapons, but they might assist with some chip torture.
- 54 • Get rid of WLAN in the home! Switch off the router at night if you have WLAN.
- 57 • Buy an EMF meter to check if your powerlines are maybe hijacked or your ethernet router starts broadcasting WLAN with that capability being off.

### 3 Non-Consensual Implanting

- 3 • This has been conducted on a vast scale for several decades now.
- 6 • An astoundingly large fraction of the population appears to be implanted with radio-frequency chips in the US and in Europe. I suspect it's the same around the world.
- 9 • People are covertly implanted at night in hotel rooms, in private homes and in hospitals.
- 12 • During operations there appears to be chips planted into the wound as a “Standard Operating Procedure”.
- 15 • People are typically implanted with several dozen body implants and additional nanotechnology.
- 18 • The chips form a Body Area Network, whereby there appear to be strong transmission and reception units implanted typically at the back of the head, top of the head or in the neck. That unit then coordinates the smaller distributed chips all across the body.
- 21 • The plans are now for these covert body chips to communicate with other people's body chips in Body-to-Body networks.
- 24 • There are many more versatile implants: ear-implants for voice transmissions (Voice-to-Skull), eye implants for deception and the broadcasting of movies, throat implants for reading out sub-vocal speech, Melanie had a strangulator implanted in her throat.
- 27 • The head chips (combined most likely with brain-chips) can steer brain function to a shocking degree. Forced thoughts and repetitive thoughts are often reported by victims, as is total mental paralysis.
- The remote-control of hands, limbs and individual muscles is a near-daily occurrence for victims.
- Other bodily functions are also remote-controlled like heart-beat, breathing, urination, defecation.

#### 3.1 What to Do About Non-Consensual Implanting

- 30 • The most important is to know that hearing voices, having hallucinations or wandering pain sensations and a host of unusual symptoms are signs for implants.
- 33 • It is as good as impossible to protect yourself and your family from being implanted. RFID chips can be shot into the body with special sniper rifles, implants can be added to food, or can be implanted at night.
- 36 • Still, always ensure that you and your family sleep in a secured room with external doors locked and items placed behind the door that would show entry.
- 39 • In hotel rooms it's wise to barricade oneself in, and have an audio recorder running through the night.
- 42 • Most important is to find already implanted devices in you and your family.
- RFID chips can be found with a bug detector, see Equipment List.
- Eye implants can be found with a \$10 UV light torch, see Equipment List.
- Ear implants' radio-frequency broadcast can be found with a bug detector.

## 4 Neurotechnology Attacks

- 3 • Neurotech uses head implants for a complete take-over of a person.
- During the take-over the victims are completely helpless.
- 6 • Sometimes victims are placed into a trance or hypnotic state and do not have a recollection of what happened.
- Sometimes victims are entirely conscious and witness their body movements being taken over.
- 9 • Mood changes can be induced to trigger unprovoked sadness, aggression, fear and lust.
- Thoughts can also be induced and steered.

### 4.1 What to Do About Neurotech Attacks

- 12 • The symptoms for neurotech use are sudden changes in thoughts, emotions or repetitive thoughts, over-fast or inescapable internal dialogue, unusual inner dialogue or spontaneous ideas that are out of character. Also
- 15 uncontrollable anger or out-of-character aggression are an indication for neurotech being used.
- RFID head chips have to be found first.
- 18 • There might be brain chips, so a head X-ray is important.
- NOTE: MRIs sometime don't show chips of a certain make (criminal cover-up!)

## 5 Asset-Stripping

- 21 • The financial destruction of the victim is the goal of these Zersetzung programs.
- 24 • There have been reports about fraudulent life insurances taken out on the victims. For example, victims are written down as directors of fraudulent companies and in case of their death the insurance pays out.
- 27 • The standard money-making schemes seem to arise out of the victim incurring costs in mitigating the damage done to property and health. Valuables are stolen in some cases.
- 30 • The property, inheritance and other assets of the victims are also stripped.

### 5.1 What to Do About Asset-Stripping

- 33 • Don't be rushed into decisions. Sleep over decisions and stick to principles. Avoid impulse purchases.
- Be aware that house-prices can be artificially pushed down by Intel if you want to sell. This is done using their criminal networks. Don't rely on
- 36 "market forces" being free.
- When dealing with companies, especially banks, expect criminality. Double check everything.
- 39 • Have a self-employed secondary source of income if possible. Don't rely on one employer if possible.

## 6 Secret Service Criminality

- 3 • Douglas Valentine already wrote a book about the drug dealing of the CIA.
- 3 • There are whistle-blower testimonies in Europe that back up shocking criminality of the Intel agencies.
- 6 • Carl Clark, former MI6, reported in the German press that Western Intel irradiates victims with Directed Energy Weapons.
- 6 • Andrea Davison, former MI6, reported about illegal weapons to Iraq and child abuse.
- 9 • William Binney, former Technical Director of NSA, reported boundless criminality in NSA including mass surveillance and conspiracies to subvert the American Constitution.
- 12 • The image that is emerging of our Intel Agencies is that rather than fighting terrorism, and protecting law and order, they in fact organise and fund terrorism, along with running large-scale trafficking operations: drug + arms + human trafficking.
- 15 • The victims of human trafficking are used for weapons testing, pharma testing, human experimentation and sex trafficking.
- 18 • Intelligence Agencies across the globe have fused to a global “One Agency” in a process identical to banks and central banks fusing into the “One Bank”, as is known in finance.
- 21 • The rampant criminality in Secret Services is a direct result of Deep Capture of the organisational structure by organised criminals, psychopaths and serial killers.
- 24 • Deep Capture is a natural process of system physics in large pyramid organisations.

## 7 Secret Societies

- 27 • Secret Societies originally developed as an attempt to circumvent and undermine the societal order.
- 30 • Their power and reach has grown over centuries or even millennia in some cases and is shockingly vast today.
- 33 • The Freemasons and the Jesuits are global powers that have created a global parallel society within the nation states and have steered the world covertly for centuries.
- 36 • By the same process of Deep Capture that affects Secret Services, Secret Societies are also under the rule of organised crime, psychopaths and serial killers.
- It is the Secret Services and the Secret Societies that are behind the systematic subversion of national security and global covert mass murder.

## 8 Genocide

- 3 • Deborah Tavares published the fact that most governments have signed Genocide Treaties at the start of the 20<sup>th</sup> century.
- 6 • Several high-profile witnesses testify to high level insiders openly discussion engineered depopulation, planned genocide and “The Great Cull”.
- 9 • There is evidence for such planned global mass murder being executed through several methods: destruction of health through irradiation (radioactive and electromagnetic), targeted poisoning or infection, targeted mutilation with Directed Energy Weapons and covert implants, targeted murder, targeted mass murder through (not so) natural disaster.

## 9 Systems Analysis for Better Systems

- 12 • There are tools and methods that are used in engineering, physics and computer science to understand complex systems and improve them.
- 15 • Using systems analysis, the breakdown of our societal systems can be predicted accurately.
- Systems analysis can also be used to develop new systems that are more resilient against Deep Capture.

## 10 The Joint Investigation Team

3 The Joint Investigation Team was founded by Dr. Katherine Horton in early 2017 to investigate horrific crimes against humanity committed by Western Secret Services and the military with the use of Directed Energy Weapons, covert neuro- and biotechnology and the systemic corruption that underlies the spread of these crimes.

6 The Joint Investigation Team is a US-European collaboration between high-integrity investigators who combine their special expertise, years of research and personal experience as victims of Secret Service criminality in trying to assist other victims of modern high-tech attacks and to stop these unbridled crimes.

9 At the time of writing, all members of the Joint Investigation Team are themselves continuously physically assaulted with modern military weaponry, receive regular death threats and suffer repeated assassination attempts. Each of the investigators has been denied assistance and remedy by their respective police services, judicial offices and legislature to this day.

### 15 10.1 Disclaimer & Document Use Policy

18 The content of this document is the work of the author for the purposes of the Joint Investigation Team. The information provided is based on the best knowledge and belief of the author at the time of writing. These documents are produced during an ongoing investigation, the information can be subject to change.

21 Original releases on a topic are marked V1, subsequent updates with V2, V3 etc. at the end of the document reference. The release date is given in the second field of the document reference number, the publication number in the third, and the initials of the author are marked in the subsequent field.

24 The reports of the Joint Investigation Team are published as part of an international public interest investigation. They are free to download and use to inform members of the public, government bodies and law enforcement. They may not be reproduced in print or online publications without the explicit permission of the author and the Joint Investigation Team. Online references and social media use of the documents has to link back to the original document at the source of publication.

30 All reports of the Joint Investigation Team are published on its website with the link
